

IN THE CLAIMS:

Please cancel claims 40-42.

Please amend the following claims:

A1  
4. (Amended) A switch as claimed in [any preceding claim] claim 1, wherein the call identification information comprises bearer service information.

6. (Amended) A switch as claimed in [any preceding claim] claim 1, wherein the first format is an in band format.

A2  
7. (Amended) A switch as claimed in [any preceding claim] claim 1, wherein the second format is an out band format.

8. (Amended) A switch as claimed in [any preceding claim] claim 1, wherein the terminating network is digital.

9. (Amended) A switch as claimed in [any preceding claim] claim 1, wherein one of the networks is a wireless communications network.

13. (Amended) A switch as claimed in claim 11 [or 12], wherein the switch is a mobile switching [centre] center.

A3  
Cm it  
14. (Amended) A switch as claimed in [any of claims 10 to 13] claim 10, comprising a transcoder.

15. (Amended) A switch as claimed in [any of claims 10 to 14] claim 10, wherein the wireless communications network is the terminating network.

A3  
concl.

16. (Amended) A switch as claimed in [any of claims 1 to 7] claim 1, wherein one of the networks is a fixed line network.

19. (Amended) A switch as claimed in [any of claims 16 to 18] claim 16, wherein the fixed line network is the originating network.

A4

20. (Amended) a switch as claimed in [any preceding claim] claim 1, further comprising:

means, coupled to the input, for determining primary call type information on the basis of a subscriber number, for forwarding first primary call identification information to the output, and for forwarding further primary call identification information to the reformatting means.

A5

24. (Amended) A method as claimed in [any of claims 21 to 23] claim 21, wherein the call identification information comprises bearer service information.

26. (Amended) A method as claimed in [any preceding claim] claim 21, wherein the first format is an in band format.

A6  
com't

27. (Amended) A method as claimed in [any preceding claim] claim 21, wherein the second format is an out band format.

28. (Amended) A method as claimed in [any preceding claim] claim 21, wherein the terminating network is digital.

29. (Amended) A method as claimed in [any preceding claim] claim 1, wherein the originating network is [analogue] analog.

*A6  
canceled.*

30. (Amended) A method as claimed in [any of claims 21 to 29] claim 21, wherein one of the networks is a wireless communications network.

*A7*

33. (Amended) A method as claimed in [any of claims 21 to 27] claim 21, wherein one of the networks is a fixed line network.

*A8*

36. (Amended) A method as claimed in [any of claims 33 to 35] claim 33, wherein the fixed line network is the originating network.

*A9*

38. (Amended) A method as claimed in [any of claims 21 to 37] claim 37, further comprising:

- determining primary call identification information on the basis of a subscriber number;
- providing a predetermined connection if the primary call identification corresponds to the call identification of the predetermined connection; and
- performing the reformatting, transmitting and establishing steps if the primary call information is different.

Please add new claim 43 as follows:

*A10*

43. A method as claimed in claim 21, further comprising:

- determining primary call identification information on the basis of a subscriber number;
- providing a predetermined connection if the primary call identification corresponds to the call identification of the predetermined connection; and
- performing the reformatting, transmitting and establishing steps if the primary call information is different.
